

## **300.11 Use of Town Right-of-Way Policy**

- I Purpose
- II Mowing in the Right-of-Way
- III Right to Alter the Right-of-Way
- IV Right to Remove Obstruction in the Right-of-Way

### **SECTION I – PURPOSE**

The right-of-way adjacent to Town roads is primarily under the control and responsibility of the Town. As such, any use of the right-of-way by adjacent landowners is permissive use, and such permission to use the right-of-way may be revoked at any time by the Town. Placement of items on the right-of-way, or the growing of crops, trees, bushes, or other vegetation, on the right-of-way by the adjacent landowners, should be considered temporary, as the Town reserves the right to remove such items or vegetation at any time.

### **SECTION II – MOWING IN THE RIGHT-OF-WAY**

The mowing of the grass in the right-of-way is with the Town's permission. While the Town encourages property owners to mow lawns up to the edge of the road, thereby improving aesthetics and reducing work for the Town Roadmen, no property interest is gained in maintaining such grassy right-of-way.

### **SECTION III – RIGHT TO ALTER THE RIGHT-OF-WAY**

The Town reserves the right to alter the right-of-way at any time. If the turf or any other planting in the right-of-way is damaged by snowplowing, rough mowing or any other Town activity, the Town has no responsibility to repair or replace it. The Town will not reimburse anyone for plantings, crops or anything else removed from the right-of-way by it.

### **SECTION IV – RIGHT TO REMOVE OBSTRUCTIONS IN THE RIGHT-OF-WAY**

The Town retains the right to remove trees, brush, crops and other obstructions when, in the Town's sole opinion, the safety of road use and the efficiency of road repair and maintenance require such removal. To the extent possible and reasonable, advance notification to adjacent property owners will be provided, but is not required. Where practical, the Town will refrain from removing crops growing in the right-of-way until such crops can be harvested. Residents are encouraged to seek advice from the Town Highway Superintendent before planting in the right-of-way.
